

Product Requirements Document (PRD)

Product Name (Working)

MenuOS

"The digital operating system for restaurants."

Vision

To become the default operating system for African restaurants, beginning with digital menus and evolving into a complete restaurant management and financial platform.

Product Mission

Enable restaurants to showcase their menu online within minutes, attract more customers, manage their offerings digitally, and build the foundation for future ordering, payments, analytics, and business operations.

Problem Statement

Many restaurants in Nigeria and across Africa still rely on:

- Printed menus
- WhatsApp photos
- PDF menus
- Instagram posts
- Verbal price updates

These create several problems:

- Expensive to update
- Customers struggle to browse
- No online presence
- Difficult to share menus
- No analytics

- No customer insights
- Lost sales opportunities

Solution

A subscription-based platform where restaurants can:

- Create a beautiful digital menu
- Receive a unique menu link
- Generate QR codes
- Update prices instantly
- Add photos
- Organize categories
- Share menus anywhere

No app download required.

Customers simply scan.
